## "Scientific Illustration as a Passion"

Maastricht, 16 - 18 October 2008

Dear friends,

As most of you have probably seen in the AEIMS newsletter, we are planning an interesting programme for the AEIMS congress in Maastricht on 16, 17 and 18 October. The congress will take place at the same location as in 2000: At the Academy of Visual Art Maastricht and is organised by our school, Master Scientific Illustration.

This year we will go back to what really binds us all as professional scientific artists and those who want to become one: The passion for Scientific Illustration.

We have invited some very interesting speakers who take us on a journey through the process of making their professional visualisations: 2 dimensional, virtual 3 dimensional and 3 dimensional: three different aspects in the specialised field of scientific illustration.

Refresh, learn or get introduced in the 3D programme: Cinema 4D and 2D vector programme: illustrator CS3.

And, maybe the most important aspect of the AEIMS congress: in 3 days time a lot of experience and knowledge from all over the world is gathered in one room!

Please turn to the next pages of this pdf document to see our programme and further information about where to stay.

A registration form is sent to you as an pdf. You can fill it out and submit it digitally.

With the registration form is an extra form attached for the exhibition we will organise at the congress. We invite everybody to join this exhibition. It very easy: Just sent us an image by mail and we will print it in high quality. Specific requirement and information can be found on the exhibition form which is attached to the congress registration form.

As always we would like to give our delegates the opportunity to give a presentation. So, if you have an interesting subject or some beautiful work to show: don't hesitate and fill out the Call for Papers form which we also have sent you. For further information and the conference programme please visit our website: [www.aeims.com/congress2008](http://www.aeims.com/congress2008)

We hope you will join us this year in Maastricht!
